technoclone

Bernd R. Binder Publication Prize

In Vascular Biology & Thrombosis Research

A clear view into the future!

The Bernd R. Binder Publication Prize was established in memory of the founder of Technoclone **Prof. Dr. Bernd R. Binder (*1945-+2010)** to promote young scientists who have shown an outstanding contribution to the field of Vascular Biology and Thrombosis Research. This prize underlines Technoclone's tradition in fostering and supporting innovative research in academia an outstanding contribution to the field of Vascular Biology and Thrombosis Research.

After 10 years being part of the Joint Meeting on Vascular Biology, Inflammation and Thrombosis, we are happy to announce that from 2023 on the BRB Publication Prize will be part of the **European Congress on Thrombosis and Haemostasis (ECTH)** www.ecth.org. The ECTH brings together researchers, scientists, clinicians and other healthcare professionals at the premier scientific congress in Europe around thrombosis and bleeding. It offers a comprehensive scientific and clinical education across a broad set of current and soon-to-be released studies, new findings, treatments or products.

About the BRB Publication Prize

One award of € 2,500.- to the first author of an excellent original article in the areas of Vascular Biology and Thrombosis Research published in an international peer-reviewed journal

Applicants are first author of a publication from an independent research institution (university, public research institute, etc.) in the area of Vascular Biology and/or Thrombosis Research.

The paper must be a journal article published (in print or online) in an international peer-reviewed journal in the corresponding year.

The prize will be awarded following the recommendation of a selected prize award committee. The awardee has to agree to be present at the Opening Ceremony of the ECTH congress.

Previous Winners of the BRB Publication Prize

Year	Name	Article
2021	Dimitrios Tsiantoulas	"APRIL limits atherosclerosis by binding to heparan sulfate proteoglycans" Nature 2021;597(7874):92-96
2020 2019	Anja Nitzsche	Endothelial S1P1 Signaling Counteracts Infarct Expansion in Ischemic Stroke. Circulation Research. 2021;128:363–382
2018	Lynda Zeboudj	Selective EGF-Receptor Inhibition in CD4p T Cells Induces Anergy and Limits Atherosclerosis JACC Vol. 71, N°2, 2018, January 16, 2018:160-72
2017	Miguel Jiménez-Alcázar Chandini Rangaswamy	Host DNases prevent vascular occlusion by neutrophil extracellular traps
